## EDUCATIONAL BACKGROUND

### PVPIT - Pune, Savitribai Phule Pune University

B.E. in Computer Engineering  
CGPA- 6.90  
May 2020

### M.S.B.T.E., Mumbai

Diploma in Computer Engineering  
Percentage - 78.80  
June 2017

### S.S.C. , Pune

Percentage - 74.40  
June 2014

## SKILLS & PROFICIENCIES

- Programming Languages : Python, SQL , C .
- Web Design Technology : HTML, CSS ,Bootstrap ,JavaScript , jQuery
- Front End Framework : Angular
- Database : MySQL
- Operating Systems : Linux, Windows

## LANGUAGES

- English , Marathi , Hindi

## HOBBIES

- Swimming
- Cycling

## PROFILE INFO

A recent graduate in the field of Computer Engineering with knowledge of C,Python. I am seeking a career that is challenging and lets me work on leading areas in Web Development . A job that gives me ocean of opportunities to learn and grow, innovate and enhance my skills and strengths in conjunction with company goals & objectives.

## CERTIFICATIONS

**Certification :** Angular

**Institute :** VLR Training Institute , Hyderabad

**Duration :** Jan 2023 – May 2023

**Certification :** Full Stack Developer

**Institute :** EDGE-Fortune Cloud Technologies ,Pune

**Duration :** Jul 2021 - Dec 2021

## PROJECT SUMMARY

### Location based parental control-Child tracking App using Android mobile operating System

Domain : Android application

Description

- We developed android application for the security purpose. GSM is digital cellular technology used for transmitting mobile voice and data services. MYSQL is used for database management to add or retrieve the data. XML JavaScript provides an interface for client application to work with an XML document.
- GPS satellite tracking the child side then it replays to the cellular tower then it receives the location details to parent side.
- The purpose of this application is child safety. Child tracking system is an app that can track and monitor the child location.

### Enhancing Blood Transfusion Safety through the use of online blood bank Management System

Domain : Web Based

Description

- Design and developing web application using .NET is a software development framework supported by Microsoft to allow for easy desktop and web application engineering.
- The purpose of these application was to collect information on how an information system helped the management of blood banks.
